

Medical Doctor

About the employer

The Barcelonaβeta Brain Research Center (BBRC) is a new research center, constituted by the Pasqual Maragall Foundation. The goal of BBRC is to become an internationally recognized centre of excellence in our understanding of age-related cognitive disability in order to provide practical solutions to the global challenges posed by the world's aging population. Our goal will be achieved by championing primary and secondary prevention programs for Alzheimer's disease and other related neurodegenerative disorders, the study and promotion of healthy aging, and the research of the basic physiological mechanisms of cognitive functions affected by healthy or pathological aging such as memory, learning and decision-making, among others. The vision of BBRC is to provide the society with distinct and innovative solutions for age-related cognitive disability by leveraging these complementary research programs in order to attain a multidisciplinary comprehension of the aging process and the pathophysiology of neurodegeneration. At present BBRC deploys its research mission through two Research Programs, the Alzheimer's Prevention Program and the Memory Program.

Pasqual Maragall Foundation, Pompeu Fabra University and "La Caixa" Foundation are permanent members of the BBRC Board. International competitive recruitment, state-of-the-art scientific facilities, effective management and continuous high-standard peer-review evaluation are the BBRC core proceedings to ensure achieving world-class research results. BBRC is affiliated and located in the Campus Ciutadella of the Barcelona Pompeu Fabra University, the building contains excellent technical facilities, including a research-dedicated 3T MR scanner, Clinical Trials facilities, EEG and Eye Tracker labs.

BBRC is also part of the Barcelona Biomedical Research Park (PRBB), a large research facility that hosts other seven different research institutions related to biomedical research, including the Center for Genomic Regulation (CRG), the Hospital del Mar Medical Research Institute (IMIM), the Department of Experimental and Health Sciences of the Pompeu Fabra University (CEXS-UPF), the Institute of Evolutionary Biology (IBE CSIC-UPF), the Barcelona Institute of Global Health (ISGlobal) and the Barcelona site of the European Molecular Biology Laboratory (EMBL), among others, in a multidisciplinary, collaborative and stimulating international environment in close contact with a clinical setting, thus conducive to translational research.

About the job

Alzheimer's disease is the most common cause of dementia in elderly people. Research into Alzheimer's disease therapy has been at least partly successful in terms of developing symptomatic treatments, but has also had a lot of failures in terms of developing disease-modifying therapies. These successes and failures have led to debate about the potential deficiencies in our understanding of the pathogenesis of Alzheimer's disease and potential pitfalls in diagnosis, choice of therapeutic targets, development of drug candidates, and design of clinical trials.

The BBRC is looking for a Medical Doctor and will report to the Responsible of Clinical Operations.

Main Responsibilities

- To participate in the clinical projects (clinical trial and observational studies) of AD prevention within BBRC:
 - Performing the clinical projects visits and assuring good standards procedures, maintaining the participant's medical safety, controlling the protocol and GCP compliance.
 - To assure the highest quality standards for Clinical Research: the candidate will act as a subject matter expert to provide guidance to internal and external researchers on Clinical Trials methods, standards, procedures and other advanced methodological issues.
 - As one of the project physicist, the candidate will be fully responsible of the pharmacovigilance issues and the close monitoring of Serious (and non-serious) Adverse Events.
 - The candidate will assist to the critical study meetings: selection visits, Investigators meeting, initiation visit, monitoring visits, etc.
 - To work in collaboration with the Responsible of clinical operations to assure the accomplishment of deadlines and the achievement of milestones along the different studies.
- Attend the needs of the BBRC/FPM on overall organization activities as developing and supervising presentation materials, providing training and supporting the development/implementation of Standard Operating Procedures as required.

Required qualifications:

Qualifications and professional experience

- MD degree in any medical field (mandatory).
- MIR (required)
- To hold a Ph.D. is preferred, but not mandatory.
- Experience as investigator or sub-investigator in national and international Clinical Research (industry and/or academic CT) will be positively considered.
- Demonstrated independent medical judgment consistent with clinical and laboratory procedures, GCP standards, policies, and regulations.
- Perfect knowledge and training to GCP will be positively considered.
- Ability of extensive interactions with academic and industry leaders, investigators and cooperative groups to optimize clinical trial procedures and correct participant management.
- Maintain the clinical team trained to assigned protocols and standards.
- Excellent verbal skills in English and Spanish, Catalan would be positively considered.

Personal skills

- Must possess strong interpersonal skills and work effectively with a multidisciplinary team.
- Ability to think independently and work collaboratively (empathic and focused team-worker).

- Organizational skills: ability to initiate, manage and direct multiple tasks and projects is necessary.
- Demonstrate the ability to solve problems.
- Interest in joining a non-profit organization with a mission of high social impact.
- Strong oral and written communication skills.

We offer

- Full-time position.
- Permanent contract
- Bonus depending on achievement of annual objectives
- Salary will be in accordance with qualifications and experience.
- Start date: September

Application process:

To apply, please submit the following: 1) Cover letter; 2) CV; All files or inquiries should be submitted electronically to: rh@barcelonabeta.org

Subject: Medical Doctor Position

Deadline: September 30th 2018
